

Set yourself apart with the right certification.

Certified Medical Coder (CPC) Exam Prep

According to the AAPC, certified coders earn an average 20% higher salaries than non-certified coders.

When it comes to getting a coding certification, the American Association of Professional Coder (AAPC)'s Certified Professional Coder (CPC) exam is one of the most well-known. Our 13-week Certified Professional Coder (CPC) Exam Prep course is specifically designed to meet the examination guidelines used by the AAPC to obtain the Certified Professional Coder (CPC) credential.

Medical coding is the translation of medical reports into a short code used within the healthcare industry. While complex and detail-driven, medical coding really comes down to knowing how to navigate the three main code sets: CPT, ICD, and HCPCS. This program will teach you to recognize how each code set is organized and the proper use.

After completing this program, participants will be able to:

- Identify the purpose and use of the CPT®, ICD-10-CM and HCPCS code manuals
- Explain and determine levels of E/M services
- Code a wide variety of patient charts using CPT®, ICD-10-CM and HCPCS codes
- Apply official coding guidelines and conventions when assigning diagnosis and procedure codes
- Understand and explain the purpose and use of Coding Clinics and CPT Assistants
