Degrees You Won’t Find at Most Other Universities

College of Business

Executive Master of Business Administration
The EMBA program is designed for experienced, mid-to-upper level business professionals who want to develop a stronger set of decision-making capabilities, leadership skills, and values perspective, along with the knowledge needed to lead their organizations.

Master of Accountancy
The MAcc is one of only a handful of programs across the country which offers graduate-level concentrations in fraud investigation, managerial accounting, internal auditing, finance and certified public accounting.

Master of Business Administration
DU’s wealth of knowledge in business and an experienced-based faculty make a Davenport MBA your best professional choice. Supported by our networks in the business community, the Davenport MBA provides you with unparalleled leadership skills. We’ll help you learn the needed business strengths and the advanced abilities that are at the heart of today’s global economy.

Master of Management
This degree offers a special master’s program for students wanting to focus their graduate degree on the qualitative aspects — people and organizations — of management.

Competency-based MBA
Credit is earned for what you know, not how long you are in class, so you save both time and money. You can complete your MBA in as little as one year or less.

College of Technology

Master of Science in Information Assurance
As the internet continues to evolve, cyber-attacks are becoming a growing threat. Davenport’s MSIA degree is certified by the National Security Administration as a Center of Academic Excellence for Information Assurance Education.

Master of Science in Technology Management
This program combines a set of business and technical competencies to give graduates the competitive advantages needed to lead information technology departments in the global economy.

College of Health Professions

Master of Science in Health Informatics and Information Management
Davenport University’s graduate program in Health Informatics and Information Management is an interdisciplinary program providing a unique blend of business, technology and healthcare graduate education for current health systems environments.

Master of Science in Nursing with a Concentration in Family Nurse Practitioner
Family Nurse Practitioners (FNP) are advanced practice registered nurses who are licensed, certified, and independent practitioners who work in collaboration with other healthcare professionals to deliver family-focused care. The advanced training and education allows FNPs to serve as primary care providers providing high quality, cost-efficient healthcare to a diverse population.

Master of Science in Nursing Online
The online Master of Science in Nursing (MSN) at Davenport University offers an advanced level of graduate study expanding on the knowledge, skills and competencies acquired at the baccalaureate or entry-level nursing education program.

Master of Science in Occupational Therapy
The Master of Science in Occupational Therapy at Davenport University provides practice-based education that prepares students to be exceptional occupational therapists.

Doctor of Physical Therapy
Coming January 2017. Applications to be accepted starting in 2016.

College of Arts and Sciences

Master of Data Analytics
Learn skills in the field of “big data,” which helps make predictions about future trends, helps companies operate more efficiently and optimizes organizational resources.

College of Urban Education

Master of Urban Education
This program prepares and develops teachers in real world settings to meet the education demands of urban environments. This innovative teacher-training program focuses on student learning, prepares content experts in clinical settings and measures progress based on data.
