The DU Libraries have a search box to help you find our resources!
What resources can I find with the new search box?
ONE
Includes many of the full-text articles out of our databases (not all)
Why not ALL the full-text articles out of our databases?
Because this service doesn’t get the article information from the databases.
They get the articles directly from the publishers, who also sell it to the databases.
Some of the publishers of the articles have chosen not to let them index the articles.
TWO
Includes open source material
What is open source material?
Open source material is material available without paying for it.
Why don’t you have to pay for it?
a) Its **copyright** ran out

Examples:
- Project Gutenberg - [www.gutenberg.org](http://www.gutenberg.org)
- Hathi Trust - [www.hathitrust.org](http://www.hathitrust.org)  
  (public domain items)
Several reasons for Open Source

b) The researchers’ funding body requires free access

Example:
Several reasons for Open Source

c) **Commitment** of the publisher to Open Access

Example:
- Elsevier - [http://www.elsevier.com/about/open-access/open-access-journals](http://www.elsevier.com/about/open-access/open-access-journals)
THREE
Information on physical books & links to e-books from our Library Catalog.
What resources can I NOT FIND with the new search box?
One
Some non-participating publishers/databases:

- Artemis Literary Sources
- Checkpoint (RIA)
- CultureGrams
- Heritage Quest Online
- Legal Forms Library
- Morningstar Investment Research Center
- SBRnet – Sport Business Research Network
- Standard & Poor’s NetAdvantage

Click on *Databases A-Z* to locate these resources.
TWO
Some databases that require input from you before they return data:

- BusinessDecision
- DemographicsNow
- KBR – D&B Industry Norms and Key Business Ratios

Click on Databases A-Z to locate these resources.
